

ENERGY FOOTPRINT

Assessment & Project Management

ASSESSMENT

- Identifying energy savings and sustainability opportunities
- Energy audits and energy footprint assessment
- ISO 50001 and SI426 audits
- Energy measurement and smart metering tools

PROJECT MANAGEMENT

- Proposals containing integrated solutions
- Procurement methodology for sourcing of products and solutions
- End to end process management

- Implementation coordination and project management
- Installation and maintenance services by qualified crews

UTILITIES PROCUREMENT

- Utilities bills analysis and audits.
- Impartial procurement and tendering.
- Multi-site supply consolidation process.
- Post supply agreement bill validation.
- MIC analysis with PSO and capacity charges evaluation and correction.

ENERGY CONSERVATION Products & Tools

- Smart Metering
- LED lighting
- Solar PV
- EV Charging
- Anaerobic digestion
- Thermal destratification
- Ventilation and heat pumps systems
- Heat and cold insulating coating solutions
- Building insulation
- Compressor heat recovery
- Monitoring systems
- Non-chemical water demineralisation for heating
- Non-chemical limescale treatment
- Electric radiators and WiFi controls
- Controls BMS and stand-alone controllers
- BMS optimisation systems
- Sensors
- Heat Meters/ Fuel and Water Meters

INVESTMENT FINANCING

- Off-balance sheet financing
- Flexible terms available
- LED / Solar PV as a service
- Projects financed from energy savings
